Professional Summary

AI Engineer with hands-on experience building production-ready AI applications using **Python, FastAPI, Flask, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), NLP, and REST APIs**. Developed and deployed an **AI Interview Coach** with ATS resume analysis, interview question generation, and hiring recommendations. Computer Science (AI & ML) graduate experienced in processing **50,000+ records** and developing machine learning models achieving up to **89% prediction accuracy**.

Technical Skills

Programming Languages: Python, SQL, Java, JavaScript, HTML5, CSS3

AI : Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Prompt Engineering, Agentic AI, Natural Language Processing (NLP), Semantic Search, Embeddings, Groq API, LLaMA 3.3 70B, Gemini API

Machine Learning: Scikit-learn, TensorFlow, XGBoost, Pandas, NumPy, Feature Engineering, Data Preprocessing

Backend Development: FastAPI, Flask, RESTful APIs, Microservices, JSON, Session Management, Gunicorn

Databases: SQLite, MySQL

Cloud & DevOps: Git, GitHub, Docker, Render, Postman, CI/CD Pipelines

Projects

AI Interview Coach | *Python, FastAPI, Flask, LLMs, RAG, Groq API, SQLite, HTML/CSS/JS* | [Live Demo](#) | [GitHub](#) **2025**

- Built and deployed an AI-powered interview platform with **ATS resume analysis, JD matching, AI-generated interview questions, speech analysis, emotion detection, and hiring recommendations**.
- Integrated **Groq LLaMA 3.3 70B, RAG**, semantic search, and prompt engineering to deliver context-aware interview evaluation and personalized feedback.
- Developed scalable backend services using **FastAPI, Flask, REST APIs, SQLite, and modular architecture** for reliable application performance.
- Deployed on **Render** using **Gunicorn** with testing, debugging, and optimization for production-ready deployment.

Customer Churn Prediction | *Python, Scikit-learn, XGBoost, Pandas, NumPy, SQLite* | [GitHub](#)

2025

- Developed an end-to-end machine learning pipeline to predict customer churn using **50,000+ customer records**, enabling data-driven retention analysis.
- Performed **data preprocessing, feature engineering, exploratory data analysis (EDA), and model training** using Scikit-learn and XGBoost to improve prediction performance.
- Built and evaluated classification models achieving up to **89% prediction accuracy**, providing actionable insights through feature importance analysis and performance metrics.

Experience

AICTE – EduSkills (Supported by Google for Developers)

Jul 2024 – Sep 2024

AI/ML Intern

Remote

- * Engineered predictive algorithms using **Python, TensorFlow, and Scikit-learn** for targeted analytics applications, elevating model benchmark accuracy by **20%**.
- * Automated data preprocessing pipelines and model training routines, cutting data pipeline execution time by **25%**.
- * Containerized development and execution environments using **Docker** while aligning local codebases with CI/CD deployment standards.
- * Collaborated effectively with cross-functional teams in an **Agile/Scrum** environment to consistently achieve project delivery milestones.

Education

Bachelor of Technology in Computer Science and Engineering (AI & ML)

2021 – 2025

Nalla Narasimha Reddy Engineering College

Telangana, India

Certifications

- **Google/Kaggle:** Generative AI & AI Agents Intensive
- **Deloitte:** Cyber Security Job Simulation (Forage)
- **SoloLearn:** Python Intermediate – Certified Programmer
- **NPTEL:** Soft Skills & Professional Communication
